

Parent Testimonials
2005-2006

My son has had the opportunity to be part of the NCC Enhancement Program. I can't begin to say enough things about this wonderful program. Without this program in place my son wouldn't have the opportunity to attend Newport Central Catholic. He receives assistance in all of his subjects and has been given great study guides as well as teaching him how to study and take notes for class. He loves the program and comes to the center on his free time to receive assistance. With the assistance of this program, he is beginning to have confidence in himself, which is something he hasn't had for sometime.

I love how the Academic Enhancement Program is set up. I receive weekly progress reports so that I know exactly how my son is doing in his classes and what test I can help him prepare for. I greatly admire the staff of the Academic Enhancement Program for their continued support to the students. Without individuals like them, there would be many students that would fall behind and once a student falls behind, they never seem to catch up.

I highly recommend that anyone who has a student that wants to come to Newport Central Catholic and has issues with academics, enroll them in the NCC Academic Enhancement Program. This is a very valuable program for both students and their parents.

Barbara Barnes

I would like to say how happy I am that Newport Central Catholic High School has such a terrific program as Academic Enhancement. My son has taken advantage of this program for 3 years. The program has kept him on track with his studies. When my son was in grade school, there was no program to help him. He struggled with his schoolwork and with teachers who didn't understand students with learning problems. Academic Enhancement makes a student feel good about himself. I would recommend this program to whoever needs it. It's great. A special thank you to the teachers.

Carol Donnermeyer

I just wanted to let you what a wonderful job Miss DePaoli is doing with the Academic Enhancement. It is mostly because of her that my son is doing so well in school this year. She shows authority and friendship to the kids, and at this age, they need that. She is a real asset to the school system. I feel like she should be recognized for the wonderful job that she is doing helping our kids. I know that it is not easy working with children who have learning disabilities, but she has shown us, as parents whose children are in the class, otherwise. My son is well prepared this year for tests, classes, and whatever else he needs throughout the day. Thank you for having a teacher like her helping my son.

Angie Turner

From a parent's perspective, the Academic Enhancement Program at Newport Central Catholic High School allows us to stay in touch with what is happening in our son's classes. We get weekly reports, which keep us abreast of what's going on. We know when papers and projects are due and when tests will be given. Our son seems to accept and appreciate the support he is receiving from this program. He has a more positive attitude towards schoolwork and has developed a desire to succeed.

Tim and Barb Rawe

Academic Enhancement- The most important change has been in the increase of my son's confidence level. I do appreciate the feedback on a weekly basis. I know how much time it takes to supply this information to all of the parents. My son has formed great friendships with other students. He has been able to relate to other students with similar problems.

The Academic Enhancement Program has been a Godsend. It has given Megan so much confidence. She now believes in her ability to learn, comprehend, and pass tests. She used to have test phobia prior to starting the Academic Enhancement Program. She no longer suffers from test fear. She is so much more confident in her own ability. She has learned lifelong skills to study for and pass tests. She has better study skills. This program helps her feel better about herself. Thank you so much for all you have done to help her. Kids who struggle in school, struggle in life. They need to know that it's okay to have a little help sometimes. Thank you for giving her confidence in herself and helping her to learn in a way that works for her. Thank you, Newport Central Catholic, for all you do to help every child.
